Drawings and Castings

Whilst we are primarily Booksellers, we continue to offer drawings or construction manuals, and high quality castings, for three projects, which are just that little bit different from the norm:

4" scale Tasker *Little Giant* Steam Tractor

3" scale Rider-Ericsson Hot Air Pumping Engine

**The Marine Engines designed by A.A. Leak
(mainly a 3" & 5" x 4" Compound)**

Details of these three designs will be found by following the links from this page.

Please note that all the prices quoted are inclusive of VAT (British purchase tax) @17.5%. Customers outside the European Union do not have to pay this, and the prices reduce accordingly, although delivery charges are correspondingly higher; the full casting sets for both the Tasker and the Marine Engines weigh around 300 kgs, so collection of these items is recommended where possible.

We can also supply the gear sets required for the 3½" gauge *Shay* and *Heisler* locomotive designs by Kozo Hiraoka, to be found in the 'Construction Manuals' section of our Booklist, but regret that we do not supply any other materials, fittings, nuts & bolts, tools etc..

If you have any queries regarding these items, please do not hesitate to contact us.

A handwritten signature in black ink, appearing to read "A.S. Harris", with a horizontal line underneath.
